Environment – How will the proposal impact on the physical environment of Staffordshire?	Transport	SCC clarifies within the new DPS that there is an expectation that care and support providers will facilitate individuals to be able to ‘get around’ in their community via appropriate transport options to access for example appointments, attend leisure activities – where these are identified as assessed eligible care and support needs	SCC has recently consulted on restricting the operating times during which persons can use their concessionary passes on public transport. The outcome of this may potentially impact upon some people’s ability to maintain existing access to their local community activities at a time they are used to.	All proposed ways of working align with The Care Act (inclusive of Funding The Cost of Care guidance) and recently launched Whole Life Disability Strategy (following consultation and engagement) Work already underway within some Learning Disability and/or Autistic Spectrum Condition supported living services to review historic transport arrangements SCC to review current Transport Policy/Practice Guidance.

	Rural Communities	<p>The new DPS will provide greater opportunities for Individuals to source care and support in their preferred location which may be within their local rural community</p>	<p>Despite best efforts, via the DPS, to source local support opportunities, Providers may not wish to establish services in particular locations</p>	<p>Work with Provider marketplace and assessment and care management teams to try and identify potential future needs in more rural localities.</p>
