#### 3. Pension Fund Performance and Portfolio of Investments as at 31 March 2015

The Director of Finance and Resources submitted a summary of the performance of the Pension Fund together with a portfolio of the Fund's investments as at 31 March 2015.

The Panel were informed that at £3.75 billion, the market value of the Fund at 31 March 2015, yet again reached an all-time high (although following recent market volatility, this had since fallen slightly to £3.56 billion). The Fund generated a return of 5.3% over the quarter, mainly due to the strong returns from global equities, followed by positive returns on property and bonds, albeit to a lesser extent. Over the 2014/15 financial year, the Fund returned 13.6%, well ahead of the return assumptions made by the Actuary in the 2013 valuation. With a return of 17.7%, property assets were the highest performing asset class over the year, with equities a short way behind at 15.2%. The Fund's bond holdings also continued to perform well.
