Notes

Data consistent with WasteDataFlow out-turns. All data is provisional until DEFRA publication

Please note; 2018/19 Q4 data is currently only provisional as it has yet to be verified by WDF

CCDC request for contamination data;
The NI191 and NI192 figures incorporate a contamination rate, as any contaminated material is removed from the numerator used to calculate NI192 and the percentage calculation for NI191 assumes the lower figure of net material recycled
Provided that all WCAs report NI191 and NI192 correctly for WasteDataFlow, which is audited to ensure that this is the case, and provided that those same figures are reported to JWMB, all parties can then have faith that the information is co

waste sent for reuse, recycling or composting
