Dear Ms Tichener

Re : Bridleway affecting Ingestre Park Golf Club

Further to the recent mails with our Project Manager Bob Hunt of International Design Group regarding the proposed bridleway at Ingestre, I am writing to inform you that we have been made aware that the proposed path between Point F and the Ingestre Parish boundary was closed very many years ago.

We understand that an arrangement was made for a replacement bridleway which ran to the north of the estate at that time.

Since the path appears to have been formally closed the case for "reinstatement" does not exist. Apart from the safety issues of which you have been made aware, if the path were taken through the golf course it would end in a dead end in front of Ingestre Hall. The section in front of the Hall was part of the closure to which I refer above.

We would also point out that a number of the references and the plan are inaccurate.

I would be grateful if you would inform the Panel of the closure, inaccuracies and "dead end" which would be generated if the path were taken through the course.

Yours sincerely

Geoff Matthews  
Honorary Secretary  
Ingestre Park Golf Club
