

PENSIONS COMMITTEE – 16 DECEMBER 2022

Report of the Deputy Chief Executive & Director for Corporate Services

Staffordshire Pension Fund Investment Benchmarking results for the period ending 31 March 2022

Recommendation of the Chair

1. That the Pensions Committee notes the report from CEM Benchmarking UK Ltd (CEM) provided at Appendix 2 and the presentation on such, to be given at the meeting.

Background

2. The Pension Fund takes part in an annual investment benchmarking exercise with an international company CEM Benchmarking Inc. CEM benchmark over 400 asset owners globally, with total assets of £15 trillion. Attached at Appendix 2 are the results of the 2021/22 CEM benchmarking survey, where Staffordshire is compared on several cost and performance metrics to a global peer group of 16 pension funds that have a median size of £7.1bn versus the Pension Fund's £6.5bn market value, on 31 March 2022.
3. It is important to understand that a straightforward comparison of investment returns and costs, as publicly reported by pension funds will never be meaningful. This is because there are several variables which also need to be considered, to obtain a like for like comparison. E.g., Assets under management, strategic asset allocation, implementation style, benchmarks etc. The survey undertaken by CEM adjusts for these variables and provides the Pensions Committee with more clarity on investment return and cost comparisons, for the Pension Fund versus the selected peer group.
