

Topic:	Performance and outcomes report – November 2015
Date:	10th December 2015
Board Member:	Chris Weiner
Author:	Kate Waterhouse
Report Type	For information

1 Purpose of the report

- 1.1 The performance and outcomes report brings together key outcome measures from the national outcome frameworks for the NHS, adult social care and public health.
- 1.2 In September 2015, the Health and Wellbeing Board agreed to receive the updated summary report on a quarterly basis as a 'for information' item.
- 1.3 The full report which is published quarterly is available on the Staffordshire Observatory website as part of the spine of the Joint Strategic Needs Assessment process for the Health and Wellbeing Board (<http://www.staffordshireobservatory.org.uk/publications/healthandwellbeing/yourhealthinstaffordshire.aspx>)

2 Summary

- 2.1 Some of the highlights from the outcomes report show that: school readiness continues to improve (although rates remain lower among children eligible for free school meals); there continues to be a reduction in child poverty rates; residents continue to be satisfied with their local area; increasing numbers of people with mental health conditions are living in suitable accommodation; there are continued improvement in successful drug treatments and Staffordshire continues to see reductions in smoking prevalence.
- 2.2 The challenges in Staffordshire are similar to the September position: there are still lower than average employment opportunities and suitable accommodation for people with learning disabilities; the number of residents with excess weight is high with low levels of inactivity and poor diets; uptake of NHS health checks remains below average; the prevalence of diabetes continues to increase; numbers of delayed transfers of care continue to increase and end of life care measures by the proportion of people dying at home is below the England average.
